Product Characteristics

Eco-friendly Material
Adopted full water foaming system and water-based paint, all the products meet the EU SGS-SVHC standards, VOC content lower than the EU and American standards.

Insect and Mildew Resistance
Low water absorption. Could not get moldy even put in water for long time; Also can effectively prevent the damage of termites and insects to products.

Customizable
Customizing customers' personalized products according to the requirements.

Dimensional Stability
Small thermal expansion and cold contraction, excellent dimensional stability

Durability
Subsequently formed polyurethane and the previously formed waterborne film can be perfectly adhered together without peeling off and discoloration, same life as building.

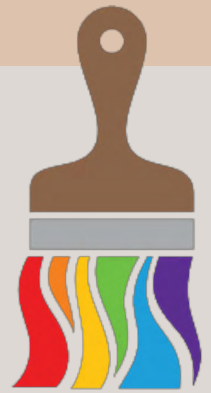

Profiling Performance
Superb mold technology enables the product surface possessing realistic wood-grained texture.

Multiple Color Options for Woodgrain PUR

Come stain or paint ready

Made of durable, high performance polyurethane with an authentic woodgrain texture, the collection combines the look of real wood with durability of urethane. From Shutters and Corbels to Louvers and Beams, there is a variety of right products to help you create a distinctive look for any home.

***LEGEN** is focused on polyurethane product design, innovation and molding technology.*

The Beauty of Urethane

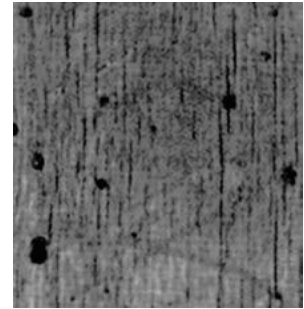

MOISTURE RESISTANT

Urethane millwork's closed cell structure prevents water penetration and absorption.

SPLINTER RESISTANT

Urethane millwork does not splinter like wood. If surface blemishes occur during installation, they can be easily repaired with ordinary plastic wood filler.

INSECT RESISTANT

Urethane millwork provides a practical alternative if you want the look of real wood detailing for your projects, but live in an area that is prone to insect infestation. Urethane Millwork/Wood Considerations.

Urethane Millwork VS. Wood Considerations

	URETHANE MILLWORK	WOOD
Quality/composition	Consistent quality; No waste; Consistent finish	Quality varies; Knots and gouges result in waste; Blotching, Disappearing grain and discoloration can occur
Versatility	All products suitable for interior or exterior application	Different grade of material and finish required for outdoor application
Durability	Resists warping or splitting; Resists weather damage and insect infestation	Can warp; Susceptible to splitting; Susceptible to rotting and insect damage
Labor Savings	Requires no sanding, Priming or sealing; Moulding easy to install	Requires sanding, Priming and sealing; Intricate moulding require multiple application process incurring high labor costs
Value	Reasonable, stable price; Long lasting good looks with low maintenance; Increases home/building resale value	Market price fluctuates; Requires periodic maintenance; May need replacement/refinishing as damage occurs

A photograph of a house's entrance featuring decorative millwork. The entrance is framed by a white, multi-tiered pediment with a dark brown metal roof. The pediment's sides are supported by white, curved brackets. The ceiling of the entryway is finished with horizontal wood planks. A black lantern-style light fixture hangs from the ceiling. The front door is made of dark wood with a transom window. The house's exterior walls are covered in light-colored horizontal siding.

A close-up photograph of various types of woodgrain siding. In the foreground, there are several long, horizontal planks with a realistic wood grain texture. Behind them, there are other siding materials, including a blue-grey shingle-style siding and a dark blue horizontal plank siding. The lighting is soft, highlighting the textures of the different materials.
